

## **Vaccines: Simplification for the families.**

An agreement signed on August 24, 2017 between the three Tuscan health authorities (central, northeast and southwest), ANCI Tuscany (National Association of Italian Municipalities), and the Regional Education Office.

It is expected that the schools to transmit the lists of girls and boys enrolled in ASL, which will then verify the vaccination status of every child and any eventual regularization will be activated with the families.

All families receive a communication from the Childcare Service by mail.
